

Innovations Exhibit

Three-days' conference on Innovation

The International Gas Union Research Conference, IGRC 2008, will be held at the Scientific Conference Center in Paris, the Cité des sciences et de l'industrie at October 8-10, 2008. This venue guarantees a professionally organised conference in a pleasant environment close to the heart of the city with "grandeur": Paris.

The IGRC provides gas researchers and other interested business partners with an excellent opportunity to exchange thoughts and ideas: 400 to 500 attendees from all over the world are expected. The conference offers you a great opportunity to expose your new developments to large numbers of key gas industry managers and engineers, in a concentrated forum, including:

- Directors;
- Managers;
- Decision-makers/system specifiers/buyers;
- Operational staff (users);
- Industry technology experts/R&D practitioners;
- Possible collaborators/co-developers/funders/technological peers.

The proposed innovations should be seen and "touched" ie typically a technology (or demonstration model or software on laptop computer). It should have been on the market not for a long time or under final development (near the market). The company might be small (start-up, ...) or bigger. Two floors of the conference with 36 locations very well situated (24 + 12) are available for this exhibit.

Technical elements

Space location of 4sqm (2 x 2) for the price of € 500 VAT Excl., including:

- 1 locking desk (L : 90 cm x W : 50 cm x H : 80 cm) and 2 chairs
